EXPERIENCE AND PROJECT

Workshop 1- NNAH Automatic Laundry Booking System C++

- Developed a self-service kiosk system in C++ to automate the laundry ordering process from start to finish.
- Designed a user-friendly interface for customers to select service packages (wash, dry, fold) and delivery/pickup options,

Workshop 2- FICTS Sport Equipment Booking System (Payment Module) PHP, HTML, CSS

- Developed the core Payment Module for a web-based booking system using PHP for backend logic and HTML/CSS for the user interface.
- Implemented functionality to automatically calculate and process fines for lost, damaged, or late equipment returns, establishing user accountability.
- Created an automated receipt generation feature to provide users with transaction records and improve system tracking.
